## **Running Workflow in Debugging Mode**

By default a *workflow* runs without debugging settings. To use it go to the *Application Settings* (Settings–>Preferences) and check the following checkbox and click *OK*:

General	Workflow Designer		
Resources Network File Format Logging Alignment Color Scheme OpenCL	Scene appearance          Show grid         Snap to grid         Element style	Extended	•
Workflow Designer Genome Aligner External Tools	Element font Element background color	MS Shell Dlg 2	•
	Runtime settings Track running progress Track debugger		

After that the two new buttons appears on the main toolbar:

(	-* UGENE - [Workflow Designer - New workflow]														
	₹og	gle∖	brea	ikj	poir	nt	Sh	owing	orwhi	dep	orea	kpo	ints	man	ager
		0			8	ь	1	82	~	-	2	1	-
