

The "db_xref" Qualifier

Some files in Genbank format contain the *db_xref* qualifier. A value of this qualifier is a reference to a database.

NC_004718 features [sars.gb]

3'UTR	(0, 1)
5'UTR	(0, 1)
CDS	(0, 14)
CDS	join(265..13398,13398..21485)
CDS	265..13413
codon_start	1
db_xref	GI:29836495
db_xref	GeneID:1489680
evidence	not_experimental

When you click on the value a web page is opened or a file is loaded specified in the reference. The loaded file is added to the current *project*.
