Configuring External Tool

To configure an external tool:

- 1. Make sure the tool is installed on your system.
- 2. Set a path to the tool executable file in ÚGENE. It can be set on the External Tools tab of the Application Settings dialog.

If the path hasn't been set for a tool, UGENE menu items that launch the tool are displayed in italic. For example, on the image below a path for the ClustalW external tool has been set, and paths for MAFFT and T-Coffee has not:

-	Edit	١.	тс	CGGGCTGAATTAGG
	Align	×	М	Align with MUSCLE
-	Tree	۲	М	Align sequences to profile with MUSCLE
∎ ا	Statistics	۲	М	Align profile to profile with MUSCLE
1	View	×	Κ	Align with Kalign
1	Export	×	*	Align with ClustalW
	Advanced	۲		Align with MAFFT
	Consensus mode		h	Align with T-Coffee
