

# HMM3

The *HMM3* plugin is a toolkit based on the Sean Eddy's [HMMER3 package](#).

While working on this plugin we were guided by the following principles:

- Make the HMMER3 tools accessible to a wider user audience by providing graphical interface for all supported utilities for most of the platforms.
- Be compatible with the original HMMER3 package.
- Create the high-performance solution utilizing modern multi-core processors.

The current version of UGENE provides user interface for three HMM3 tools: [HMM3 build](#), [HMM3 search](#) and [Phmmmer search](#).

In the original program the corresponding commands are: "hmmbuild", "hmmssearch" and "phmmmer".

To access these tools select the *Tools HMMER3 tools* submenu of the program main menu:

We highly recommend reading the original HMMER3 documentation to learn how to use utilities provided by the plugin.

- Building HMM Model
- Searching Sequence Using HMM Profile
- Searching Sequence Against Sequence Database
